The colors are as close to the original as technically possible.

The color samples of this color card have been produced using Tikkurila paint and colorants. We can guarantee color accuracy only in Tikkurila paints.

Lightning conditions, the smoothness of the paint surface and its gloss can all affect color perception. Always make your color selection under similar lightning conditions to where the color will be used.

* To ensure the exact shade, the colors marked with an asterisk should be tinted in 3 litre or larger cans.
